

ZVA 25 GR

Active Vapour Recovery for Solvents.

The active vapour recovery with open interface is a well proven system, e. g. known from Elaflex' petrol station nozzles.

A similar system is available for the filling of containers (5-1000 l) with solvents:

With the aid of a vacuum pump, the **ZVA 25 GR** serves for an effective emission protection.

Complex central suction installations or balanced systems with their sealed interfaces are no longer necessary.
