

# Two at the top of their class.

Pharmaceutical hoses for highest requirements:

## **ELAPHARM<sup>®</sup> from ELAFLEX.**

- ultra smooth lining of DuPont Teflon<sup>®</sup> PTFE
- all layers permanently bonded to each other – high resistance to kinking, pressure and vacuum service
- despite the homogeneous construction the lining can be flared over ends, no entrapment – patented
- available as non electrically conductive **ELAPHARM** with blue cover or as electrically conductive **ELAPHARM OHM G** with light grey cover  $\Omega/T$  – suitable for use in Ex-Zones
- FDA and USP Class VI conform
- easy online configuration:
