We care for
your fuel.

Slimline Type 'SLSF'

Refineries and Major Oil Companies spend considerable effort in fulfilling the maximum allowed sulphur content of 10 ppm to EN 228 and EN 590 standard. Elaflex is supporting these endeavours by providing a special type of our market standard petrol pump hose: **Slimline Type 'SLSF'**

- **rubber compounds are free of sulphur** – ensures that the sulphur content of the fuel is not increased, even if the medium remains for a long time within the hose
- available in black or colored, also special type for Low Temperature
- for diesel and gasoline fuels, also with ethanol content up to E 85
- suitable for MPD hose retraction systems
- fulfills all requirements of the relevant hose standards: EN 1360 and EN 13483
