Quick connection of hose assemblies

Cam and groove couplings are popular fittings for quick connection of hose assemblies. Elaflex is presenting a quality product line from their own production. Guaranteed to EN 14420-7 standard, reliable and operationally safe. Samples of these new cam and groove

couplings “made by Elaflex” with ergonomically designed levers will be shown in sizes DN25, 32 und 50. Further equipment specialties at the stand: new generation of DG swivels to protect hoses against torsion; new TD thread seals made of reinforced PTFE, showing significantly improved cold flow behavior and Elapharm pharmaceutical hose assemblies available in three different versions and with an expanded coupling range.

Hall 8.0, stand L93
