

Let off Pressure.

Dust Plugs and Caps with Pressure Relieve Valves.

NEW DDC Dust Cap to ADR

The ADR 2015 requires a third closing device for tank trucks, which enables a safe release of pressure in filling or bottom discharge pipes before the cap is completely removed. This protects the operator and environment.

Elaflex provides dust plugs and caps with integrated pressure relief valves according to ADR requirements.

For 'TW' couplings (MK80, MK100) you can use **dust plugs VB 80 ADR SS** and **VB 100 ADR AL**.

New in the Dry Disconnect Coupling range: **dust caps DDC-K AL ADR 2½"** and **3"**.

These dust caps PN 10 made of aluminium are used for Dry Disconnect male adapters on road tankers and allows a safe and easy operation.
