

Elaflex Equipment @ Tank Storage Hamburg 2015

Elaflex meets the standards and growing demands for safer hoses, couplings and rubber expansion joints (ERV) in the bunkering and tank storage sector. Major tank storage companies, refineries, barge and bunkering operators trust us to deliver advanced products backed up with excellent practices, procedures and certifications.

Our rubber hose and extended composite hose range FWS plus corresponding couplings, DDCs, flanges and accessories cover all types of petrochemical, marine and industrial applications including cryogenic transfer (LNG) and vapour balance operations.

We supply hoses up to 12" in working pressures up to 25 bar. Typical applications for our refuelling equipment:

- sea and inland barge bunkering operations
- ship-to-shore and ship-to-ship transfer operations
- inplant tank-to-tank transfers
- tank truck transfers
- depot bottom loading
- drum filling

In addition to our comprehensive catalogue and information please use <http://hoseconfigurator.elaflex.de/> to make your choice.
